### General information

Standard availability of all the specified products is 2-5 weeks from the time an order is placed, depending on the type of product, quantity, and potential individual requirements.

Placing an order includes approval of the final design preview. We will always confirm the delivery deadline for specific products on the basis of your enquiry or order. Please give the quantity, colour, possibly the capacity, and the required printing in your enquiry. Products in stock are identified with the "24 h" icon and can usually be shipped within 24 hours. All catalogue numbers are unique and are used exclusively for the requirements of this catalogue. We cannot guarantee 100% availability of all products in all colours throughout 2024.

## ALCOHOL TESTER WITH FUEL CELL ELECTROCHEMICAL SENSOR, LED DISPLAY AND KEY RING

### ZOP043

A high-accuracy pocket alcohol tester with an electrochemical sensor based on the “fuel cell” principle; the result is not affected by other substances in the breath and does not depend on the volume of exhaled air. The same sensors are also used in professional testers, e.g. for the police. You can perform up to 2,000 measurements before recalibrating the sensor. The device issues an alert if the alcohol concentration in the breath exceeds a user-specified limit. Package includes a set of replaceable washable mouthpieces. Can be connected to a phone app via Bluetooth. Power supply: AAA battery.
